## **Usability Study**

#### Overall Positive Responses:

- "It feels very comprehensive. So, in that sense, it is a pretty complete body of work regarding the topic."
- "Neat tool....this tool by itself seems like it is worthy of a MS in Data Science."
- "The team delved into the details of the topic and brought to light insights that all managers should understand and internalize in their meetings"

### Tasks Time and Results

### **Usability Study Actions**

01	Less is More	<ul> <li>Ensure Text is usable</li> <li>Removed unnecessary animations</li> <li>Removed redundant visualizations</li> </ul>
02	Easy Revert	<ul><li>Clarified How to Revert Visualizations</li><li>Streamlined site navigation</li></ul>
03	Reviewed incorrect responses	<ul> <li>Made visualizations more intuitive</li> <li>Changed encodings</li> <li>Clarity on Data Interpretation</li> </ul>
04	Smart Features	<ul> <li>Acknowledged user feedback on innovative features</li> <li>Implementing them is challenging with the current dataset and project timeframe; however, the feedback is compelling for a commercial grade product</li> </ul>
